NETEYE CONQUISTA LA POLE POSITION

La strategia vincente per affrontare le nuove chicane nel monitoraggio

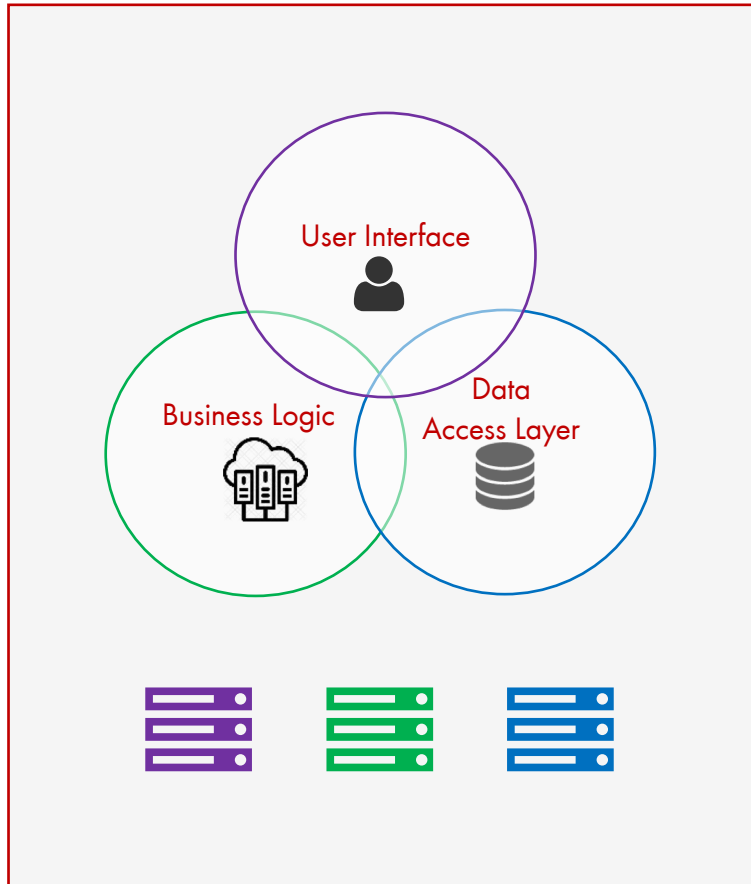

Hyperawareness is the ability to detect changes in its business environment

Informed decision making is an ability to make the best possible decision in a given situation. To do this, active decisions must be based on real data, rather than past experiences and shared throughout the organization.

Fast execution is an ability to carry out its plans quickly and effectively, enabling it to put decisions into practice rapidly, mobilize people and resources dynamically, and continuously monitor options and progress against goals.

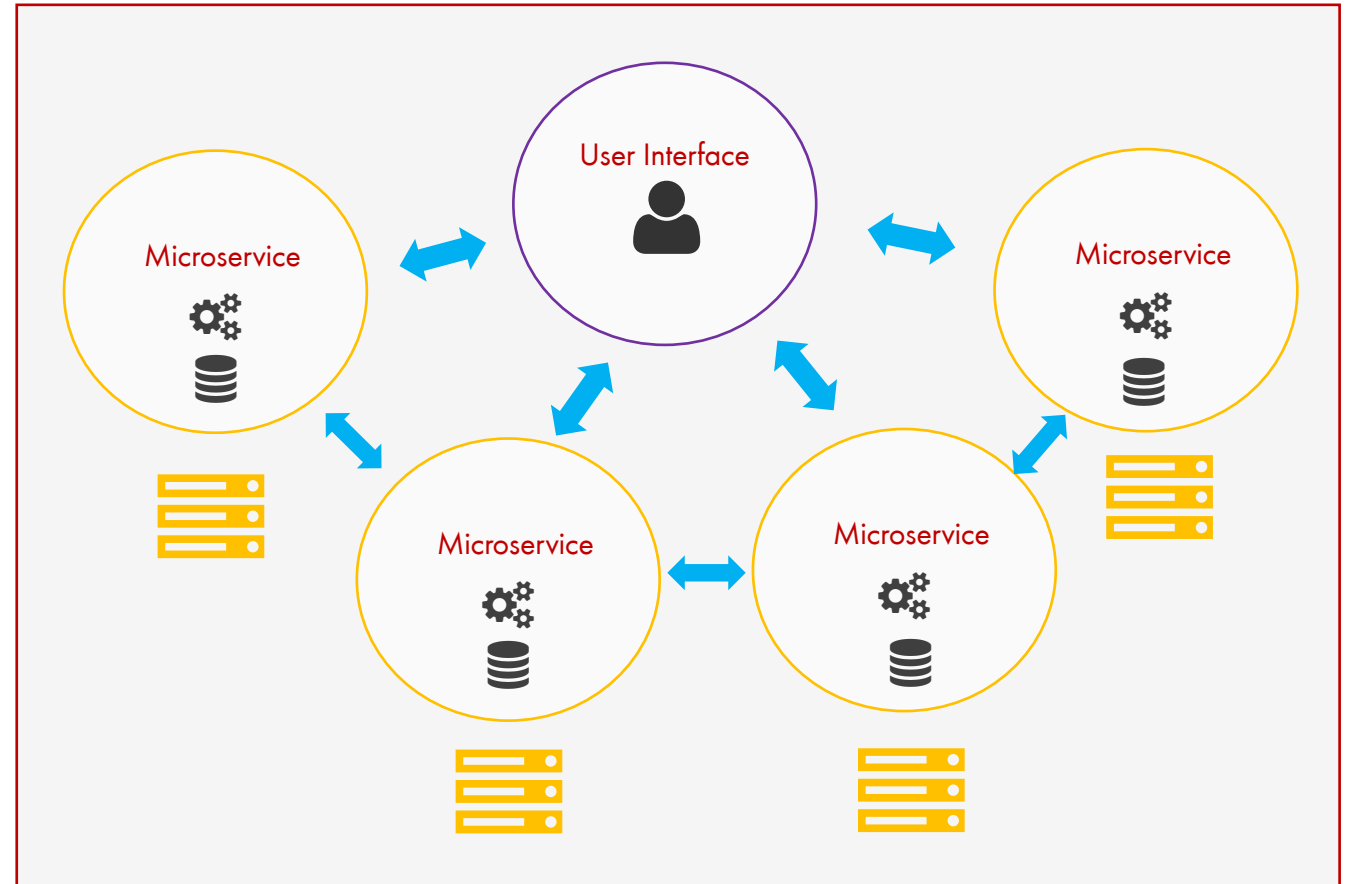

(R)EVOLUTION: IT ARCHITECTURE

VIRTUALIZATION

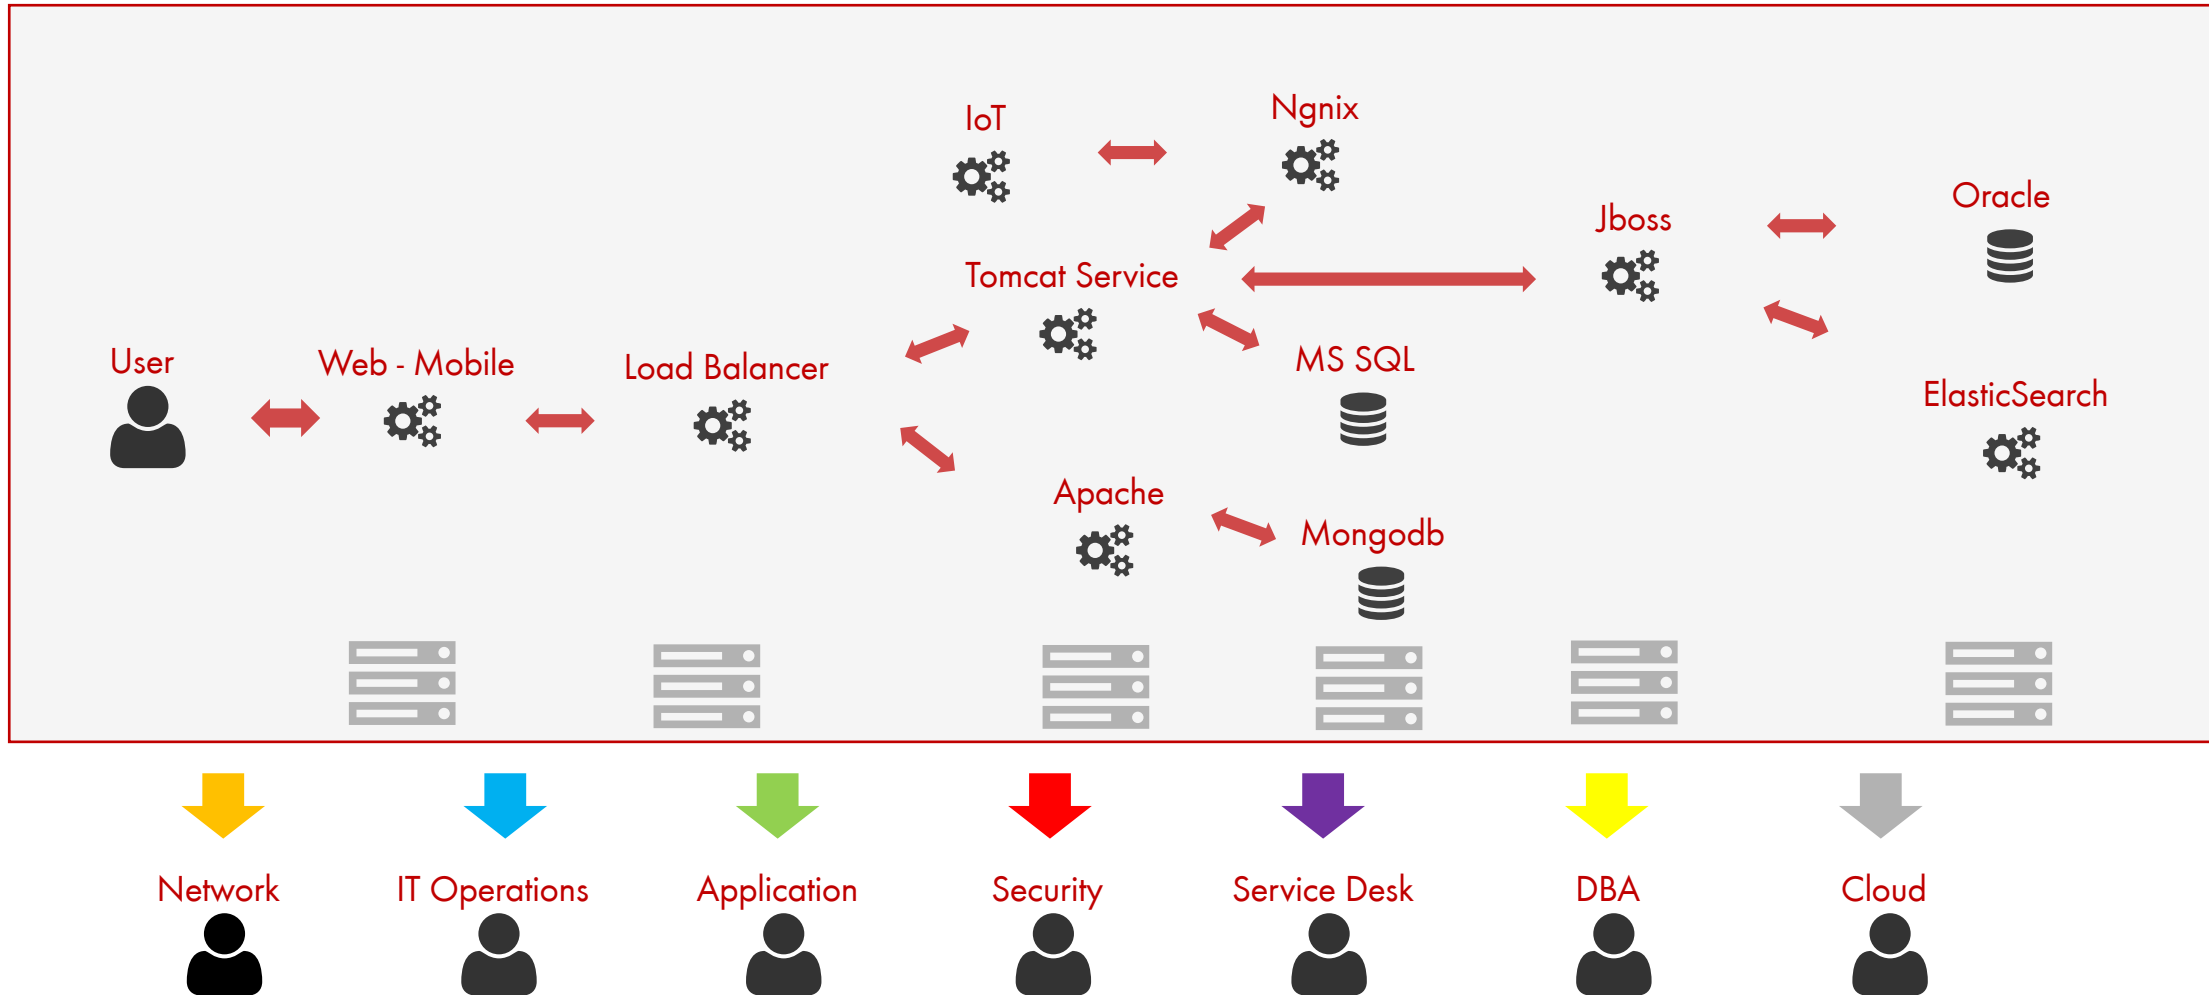

DATACENTER

VIRTUALIZATION – CONTAINER – MICROVM - ORCESTRATION

DATACENTER – CLOUD (IAAS, CAAS, PAAS, FAAS, SAAS)

AGILE – IOT – MICROSERVICE – SOA – CLOUD – SQL - NOSQL

Alyvix 3
Sahi Pro

- Is in maintenance mode
- CentOS 6 will be EOL in Q4 2020
- Afterwards we are not able to provide any security update

WE SUGGEST TO MIGRATE TO NETEYE 4 WITHIN 2020
